

Habitat survey of Sheepy Parish 2011

1. Background information

Area of Parish: 3,081ha

Dates of current survey: May 2011 - October 2011, May 2012

Time taken for current survey: approximately 8 days

Current surveyors: Karen Headley, Sue Timms & Mark Walton, Leicestershire County Council.

Access constraints: The Parish was surveyed from public rights of way and open access land only. Where access was more difficult land was viewed from a short distance with the aid of binoculars. Aerial photographs from 2006 were also used, primarily to identify woodland, plantation and arable land, but also to see if features such as ponds/hedgerows were still present when access on the ground was not possible.

Access was sufficient to adequately survey most of the Parish to a Phase 1 level. Some currently designated sites were not able to be surveyed, either being some distance away from public rights of way and not viewable or, in the case of many of the grasslands, recently mown. This is also the case for many hedgerows and ponds situated away from public access.

Land ownership and land use: A large Parish with most land farmed as arable, with frequent large, intensively managed fields throughout. Also frequent smaller fields of improved and mown grassland with some old ridge and furrow grassland. The Parish has only a few, mostly small areas of woodland and scrub scattered throughout. Two larger woodland stands, Sibson Wolds and Botany Spinney, are located in the northeast of the Parish. Several water courses pass through and in places form the boundary to the Parish, including the River Sence which flows through Sheepy Magna. There are locally frequent field ponds, particularly concentrated to the south of Upton and around Pinwall, and Sheepy Magna has several larger water bodies.

2. Existing Designated sites

Sites of Special Scientific Interest (SSSIs):

The total area of SSSIs within the Parish is 4.89ha.

Sheepy Fields SSSI

The citation document for the 1983 re-notification of the site states that Sheepy Fields contain some of the best remaining examples of neutral grassland in Leicestershire.

Local Wildlife Sites:

The total area of Local Wildlife Sites within the Parish is approximately 10.18ha.

Site Ref	Site Name		Date Notified	Last Survey	Main Habitat	Grid Ref	Area (ha)	Notes
----------	-----------	--	---------------	-------------	--------------	----------	-----------	-------

				date				
39758	Manor Farm Meadows		Mar 2004 Oct 2008	May & July 2008	Mesotrophic grassland	SK338010	9.43	
46784	Tinsel Lane Roadside Verge		Sep 2004 Nov 2009	July 2009	Mesotrophic grassland	SK362019	0.27	Approx 250 N & S sides
80004	Sheepy Magna Churchyard		Nov 2009	July 2009	Mesotrophic grassland	SK326013	0.26	
80043	Marsh nr Harris Bridge, River Sence		Nov 2010	June 2010	Swamp	SK351030	0.22	

A small part of the River Sence LWS (66669) also lies within Sheepy Parish, although the majority of the site is in the neighbouring Parish of Shackerstone. For ease of reporting the site has therefore been dealt with in the 2012 survey report for Shackerstone Parish.

Candidate Local Wildlife Sites:

None

County, District and Parish-level sites:

Sheepy Parish was surveyed in 1985/86 in a 'Field-by-Field' survey carried out by H J Mousley, I M Evans, S Grover, K Bindley, M Bradley, J Exley, R Lockwood, C Roue. The data from this survey was used as the basis for the suite of 'County, District and Parish' designations which preceded Local Wildlife Sites.

Two sites, Sheepy Fields and The Cross Hands, were originally designated as County-level sites, but both are now included in the Sheepy Fields SSSI.

There are no District-level sites in the Parish.

The total area of Parish-level sites is 47.02ha.

Site Name	P/D/C	Grid Ref	Area (ha)	Notes

Oxbow lake	P	SK360004	0.23	

3. **2011 Survey results: Designated sites**

Sites of Special Scientific Interest (SSSIs):

Sheepy Fields SSSI was not surveyed due to there being no public access. However, the site was assessed by Natural England in 2009 when its condition was rated as 'unfavourable, recovering'. The fields were partially viewable from the road and were seen to have some botanical interest.

Local Wildlife Sites:

Manor Farm Meadows (39758)

Three fields comprising mesotrophic and mixed grassland and a stream. The site was partly viewed from public rights of way during the 2011 surveys and still has botanical interest.

Tinsel Lane Roadside Verge (46784)

Most recently surveyed by a LRWT surveyor in 2009 when condition was noted as 'reasonable - unchanging' with the central section noted as being in good condition and quite species-rich, while the eastern end and the metre nearest to the hedge were fairly rank. The site was viewed during the 2011 survey and remains unchanged from the 2009 survey.

Sheepy Magna Churchyard (80004)

Closely mown species-rich mesotrophic grassland. Site visited in 2011 and appears to be unchanged from the previous survey of 2009 when its condition was recorded as 'reasonable, unchanging'.

Marsh nr Harris Bridge, River Sence (80043)

Marshy area with some open water and scrub, fenced off from grazing. Most recently surveyed in 2010 by LRWT surveyors when the condition was noted as 'good - unchanging'. Not viewable from road in 2011 survey.

Oxbow lake	P	152	Lake	59	Lake	N	Not known	?	Y	Not known

Summary of changes to County-level, District-level and Parish-level sites since previous survey of 1985/86

County-level: 0 sites

District-level: 0 sites

Parish-level: 46 sites, 47.02ha

Current condition 2011	Number	Total area (ha)	Notes
Good	8.5	2.16	Mostly hedgerows, with one Parish-level grassland, roadside verge and the River Sence.
OK	19.5	38.54	Mostly woodlands, ponds and hedgerows; couple of Parish-level grasslands.
Poor	2.5	1.77	Roadside verge interest lost, probably through poor management. Parish fields in Sibson still species poor.
Destroyed	1.5	2.35	Northern portion of two grassland sites in Sibson lost to development; grassland on Atherstone Road lost to agricultural improvement.
Not known	15	2.2	Mostly inaccessible ponds and parts of the River Sence

4. 2011 Survey Results: Candidate/ Potential Local Wildlife Sites

Candidate Local Wildlife Sites (cLWS) are defined as those which are known through survey data to meet the LWS criteria.

Potential Local Wildlife Sites (pLWS) are defined as those that are likely to meet the LWS criteria, but further survey is needed to confirm

5. Survey results: habitats

Correlations with previous comprehensive surveys

The previous comprehensive 'Field by Field' habitat survey was done in 1985. This survey used a different form of habitat and land-use classification to the current 2011 survey, which has been done using the standard 'extended Phase 1' habitat survey classification and methodology (Handbook for Phase 1 Habitat Survey, JNCC, 1990).

There is a good correlation between some of the habitat classifications used in the two survey events, but it has been difficult to correlate the two methods of grassland classification that were used. In the earlier surveys, grassland was classed according to the inset table below.

The classifications in the earlier survey were backed up by target notes, in much the same way as an extended Phase 1 survey. Unlike the Phase 1 survey classification, the earlier system does not obviously reflect species-richness or amount of agricultural 'improvement', but reflects its land-use. By referring to the accompanying target notes, some correlations between the two systems can be made, but this must be treated with caution.

Habitat codes used in earlier survey (1985)		Likely correlation to Phase 1 habitat classification used in 2011 survey	
I	Improved grassland	I/SI/AM	Improved grassland/species-poor semi-improved grassland/Amenity grassland
L	Ley (recently reseeded grassland)	I/A	Improved grassland /Arable
GP	Permanent neutral grassland (meadow)	NG	Species-rich unimproved neutral (Mesotrophic) grassland
GP	Improved Permanent neutral grassland (meadow)	SNG	Species-rich semi-improved neutral (Mesotrophic) grassland
GR	Rough, unmanaged	?	Assumed to be unimproved, at least in recent years, and includes species-rich grasslands formed on post-industrial land and disused railways. May also include neglected and abandoned agricultural land.

Further problems are caused by the presence of unclassified grassland in both survey events. In 2011, this is because it was not possible to access or view all land. Whilst recent aerial photographs were used to fill the gaps, the quality of grasslands in particular cannot be adequately assessed from aerials. In the earlier surveys, there is occasional reference to permission obtained from landowners, but it is not possible to determine how much land the surveyors were able to access or view in enough detail to assess quality. In addition, the possibility of a surveyor's bias towards recording or under-recording a particular habitat cannot be eliminated.

For these reasons, no attempt has been made to calculate actual change in areas of habitats between the two survey events, because it was felt that the results could imply a degree of certainty and statistical rigour that does not in fact exist. However, where it has been possible to make an informed and reasonably confident estimate of the likely change, this has been made in the 'notes' in the following table.

2011 Survey results: habitats

	Area (ha)/ length (km)	% area of parish 2011	Notes
Woodland (ASNW)	0	0	None present
Woodland/plantation	24.37ha	0.79	A few, mostly small woodlands/plantations scattered throughout the Parish. Two larger stands in the north-east: Sibson Wolds and Botany Spinney. Several small wet woodlands, some cLWS/pLWS. Total amount of woodland appears to be similar to the previous survey.
Scrub	3.04ha	0.1	A few small areas of scrub scattered throughout the Parish. Amount/distribution remains similar to that in previous survey.
Species-rich hedgerows	26.92	n/a	A large proportion of the hedgerows surveyed were species rich, particularly those along roadsides. Many potential LWSs. Many other hedgerows were not accessible to survey so likely to be others that are yet unrecorded.
Mature and veteran trees	n/a	n/a	Many good mature standard trees, mainly Oak, Ash & Willow. Some possible veterans. Mature Oak standard at SK3555402398, with a girth of 5.25m, is one of the largest recorded in the Borough.
Species-rich mesotrophic grassland (semi-improved or unimproved)	23.67ha	0.77	A small amount, mainly concentrated in the SSSIs and the 3 grassland LWSs, but also several roadside verges, field at SK360014 not previously identified as species-rich and small Parish-level grassland in Sibson.
Species-poor grassland (semi-improved)	68.41ha	2.22	Distribution of grassland remains similar to that recorded in previous survey. Probably under-recorded as many grasslands were not surveyed because they had been recently mown.
Improved grassland	179.08ha	5.81	Distribution of grassland remains similar to that recorded in previous survey. Probably under-recorded as many grasslands were not surveyed because they had been recently mown.
Grassland (status unknown)	399.75ha	12.97	Used where restricted access or recent management prevented more detailed assessment. Many grasslands had been recently mown. Distribution of grassland remains similar to that recorded in previous survey.
Marshy grassland/swamp	0.29ha	0.01	Single area of swamp: Marsh nr Harris bridge LWS.
Running water: rivers and	23.9ha	n/a	Several water courses present, in places forming the Parish boundary; River Sence, River

streams			Anker, River Tweed and smaller tributaries. Part of River Sence is LWS and most is cLWS.
Standing water: ponds	11.97ha	0.38	Frequent field ponds scattered throughout the Parish. Many were not viewable and therefore condition is unknown, although aerial photographs show many are still present. Some appear to have dried out. Parish-level ponds in Sheepy Magna are still present and ok.
Open habitats/bare ground/ early successional communities	1.63ha	0.05	Some small areas of bare ground present.
Arable	2150.62ha	69.8	Main habitat in the Parish.

6. Summary and conclusions

Main areas and features of wildlife interest 2011:

Sheepy Fields SSSI: two adjacent fields of species-rich mesotrophic grassland, condition rated as 'unfavourable, recovering' by Natural England in 2009. Only viewed from road in 2011 survey, but still looked to have botanical interest.

Manor Farm LWS: three fields of mesotrophic/mixed grassland and stream, only viewed from public footpath in the 2011 survey, but still appeared to have botanical interest.

Marsh nr Harris Bridge LWS: marshy area with some open water, stands of sedge and Willow scrub, not surveyed in 2011, but in 2010 LRWT surveyors noted the condition as 'good, unchanging'.

River Sence: meanders through, and in some parts forms the boundary to, the Parish. River water-crowfoot recorded at several locations and banks have some good mature trees. Crayfish recorded, although species not identified. Some parts currently Parish-level.

The Parish has lots of species-rich hedgerows and mature trees. The mature Oak standard in the road verge at SK3555402398 with a girth measured at 5.25m has one of the largest girth measurements recorded in the Borough.

In addition to **Tinsel Lane Roadside verge LWS**, there are several other good road verges with species present including Agrimony, Burnet Saxifrage, Betony, Great Burnet, Rest-harrow and Lady's Bedstraw.

The survey also identified a previously undesignated field containing species-rich mesotrophic grassland at Grid Ref SK361014. However, as the grassland was only viewed from a public footpath crossing southern part of field the remainder needs to be surveyed to establish the extent of the habitat within the field as a whole.

There were several small stands of wet woodland, although most were too small to meet the minimum size criteria for LWS.

Notable species recorded in 2011:

Restharrow (*Ononis spinosa*) on roadside verge, Twycross Road.

Main changes from previous Field-by-Field survey:

Many of the previously designated Parish-level sites were recorded as being in reasonable or good condition. However, it was not possible to survey many of the sites, either because they were some distance away from public rights of way and not viewable or, in the case of many of the grasslands, recently mown.

A couple of Parish-level grassland sites had suffered partial destruction by development or no longer had any botanical interest.

Although many of the field ponds could not be assessed during the field survey, aerial photos show that many are still present. However, several appear to have deteriorated, becoming overgrown and/or drying out, and some are no longer present.

Following the previous field-by-field survey no veteran trees and only a few species-rich hedgerows were designated. The 2011 survey identified 17 potential mature tree LWSs and numerous species-rich hedgerow LWSs. This difference is most likely due to under-recording of these habitats in the previous survey.

Candidate/Potential LWS

There are currently 5 Local Wildlife Sites and 1 Site of Special Scientific Interest in the Parish, occupying approximately 15.6ha or 0.5% of the Parish.

As a result of the 2011 survey a further 66 potential/candidate LWSs have been identified, many of which are comprised of several adjacent habitats. Sites include several mature trees, species-rich hedgerows and species-rich roadside verges. Also included are most of the River Sence and two fields of species-rich mesotrophic grassland, one previously undesignated and one currently designated at Parish level.

The total area of cLWS and pLWS is 23.66ha, covering an additional 0.76% of the Parish.

20	Sheepy	SK3663203507	Mature <i>Quercus</i> standard in hedgerow, trunk obscured.	None	V	N	Good	No	27/05/2011	KH
21	Sheepy	SK367034	Species-rich hedgerow with standards, varied, with <i>Quercus</i> sp., <i>Crataegus monogyna</i> , <i>Ulmus</i> sp., <i>Prunus spinosa</i> , <i>Corylus avellana</i> , <i>Cornus sanguinea</i> , <i>Acer campestre</i> , <i>Rosa canina</i> , <i>Fraxinus excelsior</i> . Ditch and old layers. 5 standards.	None	S	Y	Good	pLWS	27/05/2011	KH
22	Sheepy	SK3614203225	Mature <i>Quercus</i> standard in hedgerow, probably not quite pLWS.	None	V	N	Good	No	27/05/2011	KH

23	Sheepy	SK3606202375	Good, mature <i>Quercus</i> standard in grass verge. Not quite pLWS girth.	None	V	N	Good	No	02/06/2011	KH
24	Sheepy	SK358021	Hedgerow with <i>Fraxinus excelsior</i> , <i>Corylus avellana</i> , <i>Rosa canina</i> , <i>Prunus spinosa</i> , <i>Crataegus monogyna</i> , <i>Sambucus nigra</i> , <i>Ilex aquifolium</i> , <i>Acer campestre</i> , <i>Quercus</i> sp. Also Hop (<i>Humulus lupulus</i>). Has good range of species, but some parts not so varied with mostly Blackthorn.	None	S	N	Good	No	02/06/2011	KH
25	Sheepy	SK357021	Semi-improved neutral grassland. Roadside verge with <i>Trifolium pratense</i> , <i>Centaurea nigra</i> , <i>Stellaria graminea</i> , <i>Rumex acetosa</i> , <i>Achillea millefolium</i> , <i>Lotus corniculatus</i> , <i>Tragopogon pratensis</i> , <i>Lathyrus pratensis</i> , <i>Ranunculus acris</i> , <i>Scorzoneroidea autumnalis</i> , <i>Veronica chamaedrys</i> , <i>Agrimonia eupatoria</i> . Nice and varied, mostly fine sward. Richest part around bend of junction.	None	S	Y	Good	cLWS	02/06/2011	KH
26	Sheepy	SK358020	Untopped hedgerow, approx 10m high, with ditch. Has <i>Crataegus monogyna</i> , <i>Sambucus nigra</i> , <i>Rosa canina</i> , <i>Prunus spinosa</i> , <i>Ligustrum vulgare</i> , <i>Fraxinus excelsior</i> , <i>Ulmus</i> sp. Varied along length.	None	S	N	Good	No	02/06/2011	KH
27	Sheepy	SK358019	Hedgerow with ditch. Has <i>Crataegus monogyna</i> , <i>Prunus spinosa</i> , <i>Rosa canina</i> , <i>Ligustrum vulgare</i> , <i>Ulmus</i> sp., <i>Fraxinus excelsior</i> . Varied along length.	None	S	N	Good	No	02/06/2011	KH
28	Sheepy	SK360019	Species-rich hedgerow with ditch and bank. Has <i>Rosa canina</i> , <i>Fraxinus excelsior</i> , <i>Crataegus monogyna</i> , <i>Acer campestre</i> , <i>Prunus spinosa</i> , <i>Ulmus</i> sp., <i>Quercus</i> sp., <i>Rosa arvensis</i> . Also has a couple of standards of Oak and Ash.	None	S	N	Good	No	02/06/2011	KH
29	Sheepy	SK360019	Hedgerow with ditch and bank. Has <i>Acer campestre</i> , <i>Crataegus monogyna</i> , <i>Ulmus</i> sp., <i>Rosa canina</i> , <i>Quercus</i> sp., <i>Ulmus</i> sp. <i>Fraxinus excelsior</i> , <i>Prunus spinosa</i> . Also has 2 standards, Oak and Ash.	None	S	Y	Good	pLWS	02/06/2011	KH

30	Sheepy	SK3613001954	Mature <i>Fraxinus</i> standard in hedgerow. Ivy clad with small amount of dead wood. Some past surgery on road side. Good size.	None	V	Y	Good	pLWS	02/06/2011	KH
31	Sheepy	SK3614302123	<i>Quercus</i> standard in hedgerow, viewed with binoculars looked to be a good size.	None	N	N	Good	No	02/06/2011	KH
32	Sheepy	SK361019-SK364019	Tinsel Lane roadside verge LWS. As per 2009 survey: <i>Centaurea nigra</i> , <i>Agrimonia eupatoria</i> , <i>Galium verum</i> , <i>Lathyrus pratensis</i> , <i>Pimpinella saxifraga</i> , <i>Lotus corniculatus</i> , <i>Rumex acetosa</i> , <i>Trifolium pratense</i> , <i>Ranunculus acris</i> , <i>Stachys officinalis</i> , <i>Lotus pedunculatus</i> , <i>Agrostis capillaris</i> . Central section quite species-rich. Some parts more rank, particularly closer to hedgerow and eastern end.	LWS	S	N	Ok	n/a	02/06/2011	KH
33	Sheepy	SK367019	Species-rich hedgerow, A-shaped, with ditch. Has <i>Ulmus</i> sp., <i>Ligustrum vulgare</i> , <i>Quercus</i> sp., <i>Sambucus nigra</i> , <i>Malus</i> sp., <i>Prunus spinosa</i> , <i>Crataegus monogyna</i> , <i>Rosa canina</i> , <i>Fraxinus excelsior</i> , <i>Corylus avellana</i> , <i>Ilex aquifolium</i> , <i>Acer campestre</i> , <i>Tilia</i> sp. Some parts less varied. Frequent standards, mostly semi-mature, but some mature Oak and Ash.	None	S	Y	Good	pLWS	02/06/2011	KH
34	Sheepy	SK363019	Hedgerow with ditch. Has <i>Crataegus monogyna</i> , <i>Prunus spinosa</i> , <i>Rosa canina</i> , <i>Ligustrum vulgare</i> , <i>Ulmus</i> sp., <i>Acer campestre</i> , <i>Malus</i> sp. Quite varied, some gaps.	None	S	N	Ok	No	02/06/2011	KH
35	Sheepy	SK367019	Species-rich hedgerow, A-shaped, with ditch. Has <i>Ulmus</i> sp., <i>Tilia</i> sp., <i>Fraxinus excelsior</i> , <i>Quercus</i> sp., <i>Malus</i> sp., <i>Acer campestre</i> , <i>Prunus spinosa</i> , <i>Rosa canina</i> , <i>Rosa arvensis</i> , <i>Corylus avellana</i> . Some parts less varied. Frequent semi-mature standards.	None	S	N	Good	No	02/06/2011	KH
36	Sheepy	SK3768401846	Mature <i>Quercus</i> in hedgerow. Lots of dead wood and loose bark plates. Top portion of crown dead. Good size but not quite pLWS.	None	V	N	Good	No	02/06/2011	KH
37	Sheepy	SK3761801842	Mature <i>Quercus</i> standard in hedgerow with dead wood in crown, cavities and loose bark plates. Good size but not pLWS.	None	V	N	Good	No	02/06/2011	KH

38	Sheepy	SK374018	Hedgerow with ditch. Has <i>Prunus spinosa</i> , <i>Acer campestre</i> , <i>Crataegus monogyna</i> , <i>Fraxinus excelsior</i> , <i>Ulmus</i> sp., <i>Rosa arvensis</i> , <i>Rosa canina</i> , <i>Malus</i> sp. Not recently cut. Most variety at western end.	None	S	N	Good	No	02/06/2011	KH
39	Sheepy	SK372019	Species-rich hedgerow with ditch. A-shaped. Has <i>Acer campestre</i> , <i>Crataegus monogyna</i> , <i>Sambucus nigra</i> , <i>Fraxinus excelsior</i> , <i>Prunus spinosa</i> , <i>Ulmus</i> sp., <i>Rosa canina</i> , <i>Rosa arvensis</i> , <i>Ligustrum vulgare</i> , <i>Tilia</i> sp. Not very varied.	None	S	N	Good	No	02/06/2011	KH
40	Sheepy	SK359019	Roadside verge with <i>Trifolium pratense</i> , <i>Centaurea nigra</i> , <i>Lathyrus pratensis</i> , <i>Galium verum</i> , <i>Ranunculus acris</i> .	None	V	N	Ok	No	02/06/2011	KH
41	Sheepy	SK366026	Hedgerow with bank. Has <i>Sambucus nigra</i> , <i>Crataegus monogyna</i> , <i>Fraxinus excelsior</i> , <i>Prunus spinosa</i> , <i>Malus</i> sp., <i>Quercus</i> sp., <i>Ilex aquifolium</i> . 1 standard Oak. Not very varied.	None	S	N	Ok	No	02/06/2011	KH
42	Sheepy	SK368028	Hedgerow with <i>Crataegus monogyna</i> , <i>Sambucus nigra</i> , <i>Fraxinus excelsior</i> , <i>Ulmus</i> sp., <i>Acer campestre</i> , <i>Prunus spinosa</i> , <i>Quercus</i> sp., <i>Rosa canina</i> . Quite varied.	None	S	N	Good	No	02/06/2011	KH
43	Sheepy	SK3686802831	Mature <i>Quercus</i> standard in hedgerow. Ivy clad and trunk obscured, but looks to be a good size.	None	V	Y	Good	pLWS	02/06/2011	KH
44	Sheepy	SK374034	Hedgerow with ditch and 8 standards. Has <i>Crataegus monogyna</i> , <i>Ligustrum vulgare</i> , <i>Rosa canina</i> , <i>Quercus</i> sp., <i>Fraxinus excelsior</i> , <i>Acer campestre</i> , <i>Prunus spinosa</i> , <i>Sambucus nigra</i> . Quite varied. Standards of Oak and Ash.	None	S	Y	Good	pLWS	02/06/2011	KH

45	Sheepy	SK375031	Hedgerow with ditch and 2 Oak standards. Has <i>Prunus spinosa</i> , <i>Rosa canina</i> , <i>Fraxinus excelsior</i> , <i>Acer campestre</i> , <i>Crataegus monogyna</i> , <i>Salix</i> sp., <i>Malus</i> sp., <i>Ligustrum vulgare</i> , <i>Quercus</i> sp., <i>Sambucus nigra</i> .	None	S	Y	Good	pLWS	02/06/2011	KH
46	Sheepy	SK3743003085	Mature <i>Quercus</i> standard in hedgerow. Small amount of dead wood. Good size.	None	V	N	Good	No	02/06/2011	KH
47	Sheepy	SK3751703094	Mature <i>Quercus</i> standard in hedgerow. Trunk obscured, but looks to be a good size. Probably just below LWS girth.	None	V	N	Good	No	02/06/2011	KH
48	Sheepy	SK3756003109	Mature <i>Quercus</i> standard in hedgerow. Trunk obscured by Ivy, but is a good size. Small amount of dead wood.	None	V	N	Good	No	02/06/2011	KH
49	Sheepy	SK378031	Hedgerow with <i>Crataegus monogyna</i> , <i>Sambucus nigra</i> , <i>Rosa canina</i> , <i>Acer campestre</i> , <i>Quercus</i> sp., <i>Ulmus</i> sp., <i>Fraxinus excelsior</i> , <i>Prunus spinosa</i> . Varied throughout.	None	S	Y	Good	pLWS	02/06/2011	KH
50	Sheepy	SK378031	Botany Spinney Parish-level site. Not accessible, but still present as woodland. Canopy of <i>Quercus</i> , <i>Fraxinus excelsior</i> , <i>Acer pseudoplatanus</i> with understorey of <i>Ulmus</i> , <i>Prunus spinosa</i> , <i>Crataegus monogyna</i> , <i>Sambucus nigra</i> , <i>Rosa arvensis</i> . Ground flora includes <i>Dryopteris</i> sp., <i>Urtica dioica</i> , <i>Geum urbanum</i> .	Parish	V	N	Ok	No	02/06/2011	KH
51	Sheepy	SK379031	Species-rich hedgerow with ditch, old layers and 6 standards. Has <i>Fraxinus excelsior</i> , <i>Ulmus</i> sp., <i>Malus</i> sp., <i>Quercus</i> sp., <i>Crataegus monogyna</i> , <i>Prunus spinosa</i> , <i>Rosa canina</i> , <i>Acer campestre</i> . Also planted <i>Aesculus hippocastanum</i> and <i>Prunus avium</i> standards (semi-mature).	None	S	Y	Ok	pLWS	02/06/2011	KH
52	Sheepy	SK3799203164	Good mature <i>Quercus</i> standard. Good size, but probably not quite LWS girth.	None	V	N	Good	No	02/06/2011	KH

53	Sheepy	SK381031	Hedgerow with ditch and 2 standards. Has <i>Crataegus monogyna</i> , <i>Rosa canina</i> , <i>Acer campestre</i> , <i>Quercus</i> sp., <i>Prunus spinosa</i> , <i>Salix</i> sp., <i>Fraxinus excelsior</i> . Not so varied at eastern end.	None	S	N	Ok	No	02/06/2011	KH
54	Sheepy	SK380033	Pond, not accessible or viewable, but still a feature present surrounded by <i>Salix</i> . Not clear on aerial photographs as overgrown.	None	N	N	Not known	Not known	02/06/2011	KH
55	Sheepy	SK372035	Pond, not accessible or viewable, but still a feature present fenced off and surrounded by trees. Not clear on aerial photograph, possibly overgrown	None	N	N	Not known	Not known	02/06/2011	KH
56	Sheepy	SP357998	Pond, not accessible or viewable, but still a feature present - group of trees in arable field. Aerial photograph shows a pond surrounded by trees.	None	N	N	Not known	Not known	09/06/2011	KH
57	Sheepy	SK355003	Hedgerow with ditch and 1 Oak standard. Has <i>Crataegus monogyna</i> , <i>Acer campestre</i> , <i>Quercus</i> sp., <i>Ulmus</i> sp., <i>Prunus spinosa</i> , <i>Sambucus nigra</i> , <i>Rosa</i> ap., <i>Salix</i> sp. Western end not as varied.	None	S	N	Good	No	09/06/2011	KH
58	Sheepy	SK357003	Hedgerow with ditch and 8 standards. Has <i>Corylus avellana</i> , <i>Ilex aquifolium</i> , <i>Crataegus monogyna</i> , <i>Acer campestre</i> , <i>Prunus spinosa</i> , <i>Fraxinus excelsior</i> , <i>Sambucus nigra</i> , <i>Salix</i> sp., <i>Quercus</i> sp., <i>Malus</i> sp., <i>Rosa canina</i> , <i>Carpinus betulus</i> . Standards of Oak and Ash. Good variety along length. At eastern end becomes tall and untopped with trees behind.	None	S	Y	Good	pLWS	09/06/2011	KH
