

Hi Deborah

To formalize the checks I made after the previous meeting, the questionnaire data tells us that those considering all measures important are as follows:

Draining ditches = 96%

River banks = 95%

River channels = 94%

Sewers / waste water pipes = 93%

So the statement that 'more than 90% of respondentsetc ' I substantiated by the above

Hope this is ok?

Regards

John
