Hi Deborah

To formalize the checks I made after the previous meeting, the questionnaire data tells us that those considering all measures important are as follows:

Draining ditches = 96\%
River banks = 95\%

River channels = 94\%

Sewers / waste water pipes = 93\%

So the statement that 'more than $90 \%$ of respondents $\qquad$ etc 'I substantiated by the above

Hope this is ok?

Regards

John
